

OCT 8 6:00 PM @ KHS PARENT PROGRAM “VAPING... WHAT YOU NEED TO KNOW!”

Vaping, Concentrates, and Edibles

There is an alarming trend with both middle and high school students using vapes and becoming addicted to nicotine. This program will help you learn all current information about END (Electronic Nicotine Devices). You will become familiar with what harmful toxins, chemicals, and diseases are associated with vaping. Marijuana concentrates will be reviewed and discussed along with the legal ramifications of having devices and or other paraphernalia. Marijuana edibles and the current trends with these products will also be explained. You will leave with information on how to talk to your child and help them make healthy educated decisions.

Current statistics show that 1 in 3 high school students have tried vaping.

(Monitoring the Future 2017).

Collaboration between

Keansburg School District, KHS Student Assistance Program & The Department of Children and Families

Learn the facts...help your child make healthy, educated decisions.
