

June 2018

Dear Parents/Guardians,

Happy Summer! Attached you will find a Summer Math Calendar for the months of July and August. So students keep their math skills sharp, we have developed daily activities to practice different math concepts learned throughout the year. If your child experiences any difficulty, you can extend the activity for more practice. As an activity is completed, simply initial the box on the calendar. No work needs to be handed in. During the first week of school, please return your completed calendar to your new teacher. It will be counted as your first homework grade for the marking period. Academic support will be available on Tuesday, 7/31, 8/7, and 8/14 from 2:45-3:45 at the Bolger Media Center. Good luck and enjoy!
