"father... mother
stabbed me."

Excellent description!

told David if he doesn't finish the dishes she will kill him. But just then there was a complete silence and David said he felt a deep, sharp pain right above his stomach then he passed out. When Roena stabbed David her whole body was wobbling, but Roena is a drunk. Roena is a child abusing psycho that needs major help. My thoughts on this chapter "The Accident" are speechless. Roena was really lost it. The book is a true story which frightens me because children are being abused all over the world but I haven't realized that it's gotten that bad. I'm lucky to have a caring Mom.
